High School OVERVIEW

Sonlight's high school programs continue to emphasize great books and critical thinking.

But unlike the lower levels, Sonlight's high school program is structured more like a traditional high school. In the pages that follow, you'll find a course catalog, with a variety of classes you can use to create your student's schedule. With five upper-level History programs and six upper-level Literature / Language Arts ("English") programs, you can mix-and-match to make the best course of study for your students. Round out your schedule with Science, Math, and Electives.

To qualify for the 10% History / Bible / Literature discount, combine any History with any Literature program. To qualify for the 20% All-Subjects Package discount, add Science and Math to your History and Literature choices.

Our most popular pairings include a History and a Literature with the same first number—for example, American History 120 with American Literature 130. But do what works best for your family. If you have an upperclassman who needs American history, you might want to combine the American History 120 with American Literature 430 instead. Or maybe you know you won't have time for Church History 220, but the Literature

230 looks too good to miss. Use it as excellent summer reading, spread out over a few years.

If you prefer a pre-built package that has everything you need, optimized for high school grade levels, Visit sonlight.com/high-school to view our high school All-Subjects Packages.

The Role of the Parents

The high school programs do not include Read-Alouds. Some families select a few books to read aloud over the course of the year—why stop a good thing?—but this is entirely at your discretion.

At this stage, your role starts to move more to support. You are available for discussion and problem solving. Perhaps you teach organization, talk through test-taking strategies, and grade papers. But overall, your children now start to study on their own. Great preparation for college and the rest of life!

Separate Parent and Student Guides

At the high school levels, the notes in the Instructor's Guides (IGs) are written to the students, and each high school program includes both a Parent Guide and a Student Guide.

“Is it possible to homeschool through high school and graduate a well-adjusted and prepared child? With Sonlight, the answer is a definite YES!” writes Donna G of Flint, TX. “All the Read-Alouds that touched our hearts, all the deep conversations started over history questions, and all the science experiments done together as a family strengthened our relationships and opened up thought processes in our daughter that I don’t believe would have happened with any other curricula or type of schooling.”

“My husband and I felt confident that Katie was ready for college when we sent her off this fall, not only academically, but also emotionally and spiritually. She has been six hours away from us for three months now, but she is thriving! Thank you, Sonlight!”

Here, Katie poses at her graduation with her parents, Donna and Jeff. Katie used almost every Sonlight program from K-12.

The Student Guide contains discussion and thought questions. Some questions cover basic comprehension, and some are closer to college-level analysis.

The Parent Guide contains all the same information, along with answers.

Customers use these separate guides in various ways.

- Some give their children the Student Guide and later discuss the answers with them.
- Some give their children the Student Guide and ask them to write out the answers.
- Some, while acknowledging that discussion is ideal, but pressed for time, give their children the Parent Guide, and allow them to read the

answers as they study, figuring that some acquaintance with the material is better than none.

Any of these is an excellent way to use the Sonlight high school IGs.

I've just received and started going through the 200 level lit guide. I taught literature at the college level, and I am still so thankful for the incredibly helpful and thorough IG! It provides lots of introductory material, commentary, and discussion questions.

Academic Excellence

Sonlight's high school programs are rigorous and interesting. We've even had parents report that Sonlight programs from G and H on up have more and better content than their local community colleges. (And sometimes parents order Sonlight high school courses for their own enjoyment, education, and edification!)

Sonlight fully prepares students for college, the workplace, or any other post which God calls them.

I just have to give a shout out to Sonlight. My son did so well with his education that based on his ACT scores, he received a complete scholarship to college. He was also asked to be in the Honors program at the college. I am a very proud mama, but I do know that it was in a large part due to the excellent curriculum he had.

Planning Your Students' High School Years

Although high school might seem overwhelming, the reality is: it's just the next thing.

Ideally, before your children begin high school, you'll check your state requirements for graduation. This ensures that you won't forget required classes (some states require health, or government, or public speaking). It will also give you some perspective on how many classes your children will need to complete each year, and what kinds of classes are required (how many math, science, language arts, and history classes).

With the requirements in mind, you can chart a rough plan for the next four years. This will almost certainly change, but you'll be able to order with confidence, knowing you have the basics covered.

At the high school level, certain elective courses are often required for graduation, such as foreign language. Other electives, while not necessary, are highly desirable, such as public speaking, driver's ed, and psychology. Economics is often required, while money management is desirable.

If you feel intimidated about planning for high school, order Lee Binz's *HomeScholar's Guide to College Admission and Scholarships* (item number 680-02, p. 153).

Parents who have homeschooled through high school say that the high school years feel like the the beginning of the harvest of good fruit in their children. As you homeschool the high school years, may you enjoy the fruit of your labor. ♦

“Some of the (MANY!) benefits of our Sonlight homeschool experience include how well-prepared our children are for very different career paths,” writes Robert M of Sayre, PA. “Rob is active duty Navy, Grace is a nursing student, and Caleb and Joshua have learning opportunities for their future careers in aeronautics and emergency room nursing. They are so close relationally even though they are geographically far apart. Our family has used Sonlight curriculum since 1999. One of our favorite memories includes reading aloud together!”

Here, Caleb (17), Rob (22), Joshua (15), and Grace (20)—all homeschooled with Sonlight for 12 years—gather for Rob's Navy graduation. Caleb and Joshua are sharing Sonlight 400 this year.

“When we began our Sonlight journey ten years ago, the Sonlight books and the customer testimonies convinced me that this truly is the way I wish I had been taught,” writes Taryn H of Cape Town, South Africa. “A decade since our oldest daughter started with Sonlight at the tender age of four, our family continues to enjoy what Sonlight has to offer and we particularly love the Read-Aloud time together.”

Here, Katie (13) reads aloud to her siblings Kiera (14), Micah (8) and Samuel (10) from their “firm favourite,” *Johnny Tremain* (HBL D) in one of their favorite spots: the Constantia Greenbelt in Cape Town. Uncover the rich treasures of American history

Enjoy this fascinating look at the ups and downs of the nation's past. As your students transition to independent learning, they will examine the events, people, and debates that molded the United States.

This program builds on the foundation of Joy Hakim's ten volume, award-winning series *A History of US*. She tells the stories of the United States primarily through biographies—fascinating, memorable, jewel-like summaries. She adds additional fascinating sidebars, little tidbits of intrigue and interest. The whole set is profusely illustrated with photos, portraits, and political cartoons. The School Library Journal said of Joy Hakim's *History of US* series, "One of the best nonfiction series of the decade. Impossible to put down."

The Instructor's Guide offers extensive notes to go along with *A History of US*. These offer a counterbalancing perspective. Your students read the books, then think about inherent bias, about different interpretations. It's history for the curious and thoughtful.

In addition, your student will read additional books that describe a time period, a specific person, a noteworthy event. Nonfiction, biographies, and historical fiction, with photos, illustrations, and original documents.

Powerful and insightful. Pb. RA: 7-A; R: 9-A

Bible Study Sampler 110-10 \$13.99

☐ What a rich book the Bible is! We believe its words are compelling and true. Moreover, God speaks through the Bible, if we will only listen with the aid of His Holy Spirit. You don't need someone to "hold your hand" as you study God's Word. Mostly, you need to turn to God Himself, ask for His help... and study His Word! That's why you won't find a lot of explanatory text in Sonlight's Bible Study Sampler. Nor will you find leading questions. Instead, you'll find 36 weeks' worth of very simple, standardized questions, with spaces for you to write your answers. Each week you will study two passages from the Old Testament and three from the New. You will dig into the meaning of various songs, sayings, biographies, prayers, and more. Before Columbus 120-03 \$13.99

☐ Mann. A beautifully illustrated, scholarly look into the civilizations before Columbus. Focuses on three main questions: Was the "New World" really new? Why were small groups of poorly equipped Europeans able to defeat large Native American societies? What impact did the thriving native civilizations leave on the land? Presents new research in a compelling case that Native Americans created societies that were older, bigger and more highly developed than historians have traditionally thought. Fascinating! Hb. RA: 4-A; R: 6-A

The Boys' War 120-04 \$9.99

☐ Murphy. During the Civil War, both sides ended up using teens. They fought and struggled alongside men three times their age. These soldiers were the age of the student readers. Their photographs and firsthand accounts

“As a family living overseas with five kids, we have gratefully used Sonlight for 19 years,” writes Annette E of Central Asia. “How many times I have thanked the Lord for a curriculum that gives a rounded world perspective based on solid, biblical thinking.”

“While overseas workers before our time had to search and pick curriculum while trying to do everything else on their plates, Sonlight has so aptly done that searching and selecting from much more experience and knowledge than I have. I can take the curriculum and excellent resources and use what fits my setting and child's needs at the time.” In this photo: While on a layover in the Istanbul airport, Josh (14) and his dad discuss the history reading about Constantinople. Annette says, “It was great to be able to talk with Josh about these events where they actually took place.”

Josh is studying Sonlight 200. The older four E children used Sonlight for a decade apiece and have all successfully participated in the honors programs of good universities.

“I regret having waited to try Sonlight because the quality of the curriculum is truly amazing!” writes Stacy J. of Norway. “All the hours spent reading together made Sonlight worth every penny. I’m currently reaping the benefits of a relationship with my teenage son that I believe I wouldn’t have had otherwise.”

“While I read about parents struggling through those dreaded teenage years, I’m actually relishing them. The discussions we have while reading bleed over into some very heartening conversations as we do life together. I’m so thankful to have this time with my children, and for my children to have this special time with each other. Thank you, Sonlight, for making our homeschool journey so sweet.”

Here, Elliot (14) reads a book from HBL W in his fifth year Sonlighting. Stacy says, “It’s always wonderful to catch my teenage son choosing to read a high-quality book, especially when so many of his peers spend their free time on video games.”

☐ Freedman. Most Americans know about Rosa Parks refusing to give up her seat on the bus. But who were the rest of the boycotters? The Panama Canal 120-50 \$5.99

☐ Pascal. A fascinating, colorful look at the Panama Canal, the idea behind it, how it was built, the men who built it, how it operates. Photos. Pb. RA: 4-A; R: 6-A

Sacajawea 120-05 \$7.99

☐ Bruchac. Creative account of the Lewis and Clark expedition. Alternative chapters told in the voices of Clark (with selections from his diaries) and Sacajawea (with authentic Native American stories). Shh! We’re Writing the Constitution 120-08 \$6.99

☐ Fritz. A brief, fun overview of the sweltering summer of 1787, when fifty-five delegates gathered to establish a stronger central government. Gives students a foundation

for understanding the people, events, debates and decisions that produced the Constitution of the United States. Although this seems, perhaps, too childish a book for high school, students read it in two days, then read the Constitution itself. Three days spent on the founding document of our nation: seems like a good plan! Pb. RA: 4-A; R: 6-A

The Slopes of War 120-62 \$7.99

☐ Perez. A young soldier from West Virginia faces the Battle of Gettysburg, knowing his two cousins may be fighting him. Thought-provoking. Pb. RA: 5-A; R: 7-A

Traitor: The Case of Benedict Arnold 120-71 \$6.99

☐ Fritz. A stunning character study; an entertaining biography. Written by a multiple award-winning author. Pb, illus. RA: 2-A; R: 5-9

World War II 120-09 \$19.95

☐ Maybury. Richard Maybury looks at WWII from a contrarian perspective. For example: if the Allies controlled 92% of the world’s oil reserves, could the Axis ever have triumphed? Or Germany invaded Russia, in that classic blunder of starting a land war in Asia. The snow fell on the lightly clad German soldiers several months before the attack at Pearl Harbor, raising the question: was the United States’ involvement in WWII necessary? And, if so, was it right to side with Stalin, whose total death toll was far, far higher than Hitler’s? Was there a “right” side in this war? Provocative, thought-provoking. Pb. RA: 4-A; R: 6-A

The Yanks Are Coming 120-11 \$13.95

☐ Marrin. A gripping account of how the United States joined WWI and helped turn the tide of the entire war. This fascinating narrative brings the war to life and reveals how the US mobilized industry, trained “doughboy” soldiers, and promoted the war at home. Life in the trenches, the food, the heroes and villains, battles at sea and sky. Fascinating and wide-ranging. And although WWI is often passed over for the more horrific WWII, WWI was incredibly important and, sadly, laid the foundation for WWII. Pb. RA: 4-A; R: 6-A

History of the Christian Church

Grades: 9-12 • Ages: 14-18

Full Year

Discover 2,000 years of Christian heritage

The Story of Christianity, one of the primary books in this program, says, “For Christians and non-Christians alike, the story of Christianity is a major part of the world’s history. The Christian faith has affected every sphere of life, from morality to politics, from art to literature, from science to philosophy.”

Since the days of the Roman Empire until now, your students will learn about the creeds and schisms, the decrees and theses, the doctrines and denominations. From the East to the West, they’ll witness the good and the bad, as fallen people have fought Crusades and built hospitals, as the good news of Jesus offers hope, compassion, freedom, and progress . . . most of the time.

And you’ll meet dozens of evangelists and pioneers who have told the good news to those who have not heard.

It’s a history of the Church and the people in the Church.

Our hope is that students will end this year knowing God better, loving Jesus more dearly, and understanding the world more fully, so that they are equipped to follow God’s call more completely.

“Sonlight offers captivating and delightful books that keep the attention of my boys,” writes Lisa W of Minnesota City, MN. “After the long, cold winters in Minnesota, we like to read outside in the spring. Along with our dogs, Misty and Sierra, and friendly chicken, Vanilla, my teenage boys still enjoy Read-Aloud time with Mom. The book I’m reading, *God’s Smuggler*, is especially dear to my heart, as I served on an overseas mission trip to China with Open Doors Ministry. I feel privileged to share this personal experience with my boys as I read the story of Brother Andrew, who started Open Doors. Although homeschooling has its challenges, I cherish the time I get to spend with my boys, and Sonlight helps make that possible!”

Here, Joshua (13), Josiah (16) and Lisa read *God’s Smuggler* on the deck outside. They are using HBL H and 200 in their 11th year Sonlighting.

Understand, engage, and transform the modern world

In 1900, it took days to travel from Europe to America. By 2000, it took hours. In 1900, the radio had barely been invented, and broadcasts were still several years away. By 2000, the radio had come and gone.

This was an astonishing century that brought massive changes to global society. Sonlight 320 helps you understand those changes—the key events, people, conflicts, inventions, and changes. It's a powerful course.

One Sonlighter reports:

Why is 320 so important and different? Because it covers in-depth a century of human atrocities, genocide, horrible wars, achievements, accomplishments—a century that was supposed to be civilized. And yes—there are dark and depressing books, books that make you sad and furious at the same time, and yet books that leave you with hope for the human race. I can't imagine skipping 320. It was my daughter's absolute, 100% favorite Sonlight program because she learned SO much about the truth of the century, and got a glimpse of where we are headed or could be headed.

“When we decided to homeschool with Sonlight, I was nervous as it was so different from what I knew as ‘school,’” writes Karen B of Nixa, MO. “What if I ruined my kids? Didn’t school have to include textbooks and workbooks? The more I read about it, however, the more I liked the idea of learning through wonderful, quality books. Just the thought of sitting and reading with my kids made homeschooling seem like something I could actually do. It’s 13 years later, and we’ve never looked back. Three kids have graduated using Sonlight. We’ve shared fascinating books together, had amazing discussions along the way, and when we took time off at Christmas, the kids were indignant that we also took time off from reading. After all, “that isn’t school!” I’m a little jealous I didn’t get to learn this way in school, but I’m thankful I’ve been able to provide this for my children.”

Here, Adam (16) studies 20th Century World History.

310-20 \$15.99

□ Lewis. One of the 20th Century's master wordsmiths presents the case for Christianity—"mere" Christianity: "a hall out of which doors open into several rooms"—the various Christian churches and denominations. People should never stay in the hall, Lewis says, but they must at least enter the hall before they can go into one of the rooms. Learn from this gentle and brilliant author. Excellent. Highly recommended. Pb. RA: 8-A; R: 9-A

She describes her life prior to Vietnamese occupation in the capital city of Phnom Penh; several attempts by her family to flee the concentration camps; finally leaving for America and finding a new life, while still searching for her now-separated family. Survey the heritage and history of the United States Government

Thirteen American colonies united, after a desperate war, into one United States. This new nation created a unique system of government, previously unknown in the world. Not a democracy, but a constitutional federated republic.

From those early days until now, elected officials have had differences of opinion on everything from banking to the Louisiana Purchase, from the legality of secession to the legality of separate but equal.

Begin with the purpose of government, as the Scripture says. Read the surprisingly fascinating history of United States government, along with primary source documents.

Learn about the House Ways and Means committee, why controversial Supreme Court rulings come in June, and the differences between caucuses and primaries.

Would the Founding Fathers recognize today's Beltway, with lobbyists, bureaucracy, special interest groups? Whether they would or not, you will know how to make a difference in Washington. Today's news will make sense.

Basic American Government 420-10 \$40.00

☐ Carson. We looked at dozens of texts before settling with delight on this volume. It provides exactly the kind of basic outline needed for a high school civics class. Mr. Carson provides a thorough view of the historical events that have permitted our national government to become the Leviathan it is today. For a work that covers so much difficult and complex material, this book is astonishingly thorough, well-organized, and easy to read. This course uses about 400 of the 500 pages. Hb. R: 9-A

Black Like Me

After reading this book, you will know how to get involved in politics, without campaigning or moving. Pb. R: 8-A

Selecting a President

420-03 \$29.99

Consider modern-day economic theories and values

Thinkwell co-founder Dan Heath writes:

I had an amazing microeconomics professor when I was a freshman in college. In the first minute of the first day of class, he asked a question: Why do you always see multiple gas stations clustered on the same street corner? It seems a bit crazy, when you think about it. Why would a gas station owner deliberately position himself next to the competition? An hour later, we knew the answer. More importantly, in the span of one class period, we had learned that economics is not about money. It's about a new way of thinking.

That amazing professor is the primary teacher of this course. Unique among Sonlight programs, this program centers around online video lectures, not books.

Many states require Economics in order to graduate. This program gives students a balanced, critical view of modern Economics, from basic theory to politics and trade.

Explore the rise and fall of influential thought

What’s behind the events of history? Why do humans behave as we do? What beliefs drive our behaviors?

Every individual has an underlying worldview, a way to make sense of reality, like tinted glasses that each person looks through to see the world. When you study the beliefs that people hold, you gain insight into why people think and act as they do.

Sonlight’s *World History and Worldview Studies* allows your upper level high school students an opportunity to discover, in historical context, the ideas that have shaped history, and the consequences of these ideas and philosophies. My hope is that it will help them think deeply about issues of personal, social, and ethical significance.

The spine of the history program is the two volume set *Streams of Civilization*, covering ancient history through the beginning of the 21st Century. Written by Christians, these books not only provide a beautiful historical overview of the rise and fall of civilizations, but also offer unique insights about science, music, art, architecture, and pop culture. Along with four

excellent books in Bible, your students will think through the beliefs that will guide them through their lives as they grow in maturity and are deeply rooted, prepared to make a positive difference in God’s kingdom

Experience the moving moment when escaped slaves realize they've reached freedom. So powerful, so beautiful. The narrator is funny (hysterically funny at times), but the story is, at times, gut-wrenchingly sad. The lesson on why not to use racial epithets is strong; the wickedness is dark; the allusion to what happens to female slaves is ... upsetting. This is one of my favorite books in this program. Intense. Based on an actual community of free slaves in Canada. Pb. RA: 4-A; R: 6-A

A Long Way from Chicago 130-17 \$7.99

☐ Peck. Newbery Honor. Joey and Mary Alice Dowdel go to stay with their grandma in rural Illinois. Each chapter is a short story, set in consecutive years, so we see Grandma Dowdel in a range of circumstances in the early 1930s. She is a force to be reckoned with, one of the most funny, feisty, quick-witted characters in literature. Absolutely delightful. Pb. RA: 3-A; R: 5-A

Maniac Magee 130-52 \$8.00

☐ Spinelli. Newbery Award. One of my daughters' favorite books in high school. She read it over and over as her comfort book. Peace Child 130-15 \$14.99

☐ Richardson. This is an intense missionary biography. It's amazing, but it's shockingly dark in places. How would you reach a culture that thinks that Judas is the hero of the Gospel story? And yet... there is utter transformation! This is a standout book, an absolute favorite of many of our customers, because the contrast between darkness and light is so incredibly dramatic. Pb. They Loved to Laugh 130-06 \$13.95

☐ Worth. My favorite book as a girl. I checked it out of the library so many times I was embarrassed about what the librarians might think. Besides the inherent charm of the story, this offers a detailed look at what life was like in the 1830s: cutting ice for the cold house, having an entire person dedicated to weaving just to keep the family clothed. Based on the author's family history in North Carolina. Pb. RA: 4-A; R: 6-A

When You Reach Me 130-19 \$7.99

☐ Stead. Newbery Medal. A young girl starts to receive mysterious notes, scrawled on tiny slips of paper: *I am coming to save your friend's life, and my own. I ask two favors. First, you must write me a letter ...* Miranda realizes that whoever is leaving the notes knows things no one should know. Can she prevent a tragic death or is she already too late? Splendid, engrossing. Pb. RA: 6-A; R: 6-A

A Wrinkle in Time 130-18 \$6.99

☐ L'Engle. Newbery Medal. This book, with quantum physics (space travel), was rejected by at least 26 publishers in 1960, because it was, in L'Engle's words, "too different. It deals overtly with the problem of evil, and it was really difficult for children, and was it a children's or an adults' book, anyhow?" No matter. This is a timeless book, beautifully written, unique. Pb. RA: 3-A; R: 4-A

A Year Down Yonder 130-94 \$7.99

☐ Peck. Mary Alice, a middle-class high school girl from Chicago, leaves the big city to spend 1937 in rural Illinois with her rough-around-the-edges and unconventional grandmother. The zany, adventure filled experience is not only eye-opening for Mary Alice, but heart-warming and hilarious for readers as well. Pb. RA: 3-A; R: 4-A

Delight in award winning titles & authors

This is a friendly high school literature program, filled with sleeper hits to enjoy.

Chronological stories, mostly by British authors, bring to life time from first century Israel to World War II and beyond.

The range of genres is especially rich: historical fiction, legend, short story, lyric poetry, detective stories, ghost stories, Gothic horror, science fiction, fantasy, memoir, Gothic romance, adventure, novel, allegory, survival tale, tragedy, epistolary, myth, and comedy.

If you know you won't be able to get to all the Sonlight literature courses, this is one that lends itself well to summer study, doing some every year until finished. These books are intellectually challenging, without pushing the limits of vocabulary and comprehension. (Also excellent for a parent of young children who wants something enjoyable and intellectually challenging—but not too much.)

For the reluctant reader and the passionate bibliophile both, this is a program to savor, with books you'll return to repeatedly for the rest of your life.

The Annotated Pride and Prejudice 230-54 \$18.95

☐ Austen. This version is one of the eight I would want on a desert island. Beautifully written, it's a love story where both parties have to change significantly to be worthy of one another; where all the girls marry up, a story with intelligence and wit and sparkle and passion. I had read the book multiple times, but to read it with the 2300 annotations on facing pages made me feel like I was reading in color, where before I had only been reading in black and white. Tidbits that would have been obvious in Jane Austen's time aren't necessarily obvious any more, and there are a few parts where I would think, "something witty probably just happened, but I have no idea what." This book explains it all.

“We pulled Annie out of public school when a friend introduced us to homeschooling,” writes Jennifer K of Sweet Home, OR. “I’d never really heard much about homeschooling before. I was intrigued. For the first two years, we changed from curriculum to curriculum, but then I met a Sonlight mom. She showed me all her books and we were hooked! Annie started Sonlight in fifth grade with HBL D+E. We felt like we were home! After that first year, she took the Oregon state test and scored with flying colors on the American history portion. If I thought I was hooked before, after that I was convinced literature-based curriculum really works! The times we have spent reading together will be memories we never forget.”

Here, Annie (14) cuddles with her dog Dakota while reading *Pilgrim's Progress* from Literature 230. She's studying Sonlight 200 with *Apologia Biology* in her fifth Sonlight year.

Going Solo 230-30 \$7.99

☐ Dahl. One of the 20th Century's best-loved authors tells his personal story of "going solo"—striking out on his own in his first job (in East Africa!), flying combat for the RAF in WWII...and returning home to Mother. By turns humorous and blood-thumpingly exciting. Delightful! Pb. photos. RA: 3-A; R: 5-A

The Outlaws of Sherwood 230-02 \$15.00

☐ McKinley. The best Robin Hood story ever. How do these people in the woods survive? What would it be like to be Robin, who must live with a price on his head, an average guy with more responsibility than he wants? It is so human, so entertaining, so thrilling. It's a great story even told poorly, but it becomes transcendent in the hands of a master storyteller, as this is. Pb. RA: 5-A; R: 6-A

A Parcel of Patterns 230-50 \$9.99

☐ Walsh. The Plague comes to town via a parcel very innocently bought. I love how this author writes. Pb. RA: 4-A; R: 5-A

☐ Maier. After reading it, I felt like, for the first time, I really understood what it was like to live in passionate Jerusalem and refined Caesarea, to try to figure out the vague reports and excited rumors that would have swirled around Jesus' life. We are fortunate to have eye-witness accounts in the Gospels. But at the time—what would people have known? Pb. RA: 4-A; R: 5-A

The Ramsay Scallop 230-56 \$7.99

☐ Miller. Listed as one of the finest American plays of the 20th Century, the aging salesman is sidelined, after a life of average, and a few below-average decisions. Devastating, powerful. Pb. **RA:** 7-A; **R:** 7-A

The Elements of Style 430-12 \$9.95

☐ Strunk and White. Cowritten by the author of perennial favorite *Charlotte's Web*, this slim volume gives specific instructions on writing. After reading this, you will want all the characters you read to "say" things. Not "chortle" or "trill" or "growl." Outstanding. Pb. **R:** 7-A

Ender's Game 430-03 \$7.99

☐ Card. One of my all-time favorite protagonists. Ender, a prodigy, trains to command the fleet against a third alien invasion. I love reading about how he thinks, love reading about his training, love reading about his battles. For me, this is delight. But it can also prompt discussion about the uses and abuses of power, about just war, about cultural misunderstanding. This science fiction book won both the Hugo Award and the Nebula Award, the two most prestigious awards in sci-fi, and made it on the Modern Library's list of 100 Best Novels. Compulsively readable. Pb. **RA:** 6-A; **R:** 8-A

Eternity in Their Hearts 420-30 \$15.99

☐ Richardson. In 1795, deep in the jungles of Burma, hundreds of tribesmen rush out to a clearing to greet a white-skinned stranger. Could he be the one to bring the

book their forefathers lost so many centuries ago—the book that tells the secrets of Y'Wa, the Supreme God? Astonishingly, yes! Don Richardson believes that God has not only prepared the Gospel for all peoples, but He has prepared all peoples for the Gospel. This book examines dozens of examples of peoples around the world whose cultural background prepared them to receive the Gospel long before missionaries ever appeared. Richardson suggests that all peoples have a sense of God's existence. The title of the book comes from Ecclesiastes 3:11: "[God] has...set eternity in the hearts of men" so that they will seek Him. Pb. **R:** 8-A

Evidence Not Seen 430-05 \$14.99

☐ It encourages my faith to read what God has done for his children. In the midst of horrible circumstances in a Japanese internment camp in WWII, Darlene Deibler Rose survived. (Once, desperate for bananas, she pleaded with God for one and the camp commander gave her 92.) Seek God's prompting and then obey. Powerful. Pb. **RA:** 6-A; **R:** 8-A

Fidelity 430-08 \$15.00

☐ Berry. One of the most beautiful books I've ever read, with five short stories, loosely interconnected. Perhaps the best demonstration of Christian community ever written. And the best love story! What happens? A young wife gets the flu. How can that be a love story? Read it to find out! Pb. **R:** 7-A

The Grapes of Wrath 430-37 \$18.00

☐ Steinbeck. Nobel Prize. "One of the greatest and most socially significant novels of the twentieth century." Indelibly captures America during the Great Depression through the story of the Joads, an Oklahoma farm family

forced to migrate to the land of promise, California. Out of their trials and repeated collisions with the hard realities of an America divided into Haves and Have-Nots, Steinbeck creates a landmark novel that is, at once, intense, tragic, and stirring. Pb. **R:** 9-A

How to Read a Book 430-09 \$16.99

☐ Adler & Van Doren. If you read for information, basic literacy allows you to extract the facts from the text. But literature requires more effort, more thought. Called "the best and most successful guide to reading comprehension," this is an education of how to be a liberal arts student, how to read and understand more than the basic plot in practical books, plays, poetry, history, science, mathematics, philosophy and more. Pb. **R:** 9-A

Jacob Have I Loved 430-40 \$8.99

☐ Paterson. Newbery Medal. Louise knows that she should be proud of her beautiful twin, Caroline. But she is convinced that, ever since they were born, Caroline has done nothing but take from her: their parents' love, Louise's hopes for an education, even her best and only friend. That is the way things appear to Louise. But is it the truth? A book that will challenge many teenagers who perceive themselves as unloved. Pb. **RA:** 8-A; **R:** 8-A

My Ántonia 430-49 \$7.95

☐ Cather. H.L. Mencken once wrote, "No romantic novel ever written in America, by man or woman, is one half so beautiful as *My Ántonia*." I believe he is correct. The space I am allowed here to describe this book cannot do it justice. I cannot read a few paragraphs without tears leaping to my eyes, the words are too beautiful. Summary: the fond remembrance of an astonishing, but believably real, immigrant woman from Bohemia living in 1880s Nebraska. A literary feast. Pb. **RA:** 8-A; **R:** 9-A

“Sonlight has afforded us the opportunity to discover through an array of literature that teaches academics as well as character,” writes Yolanda S of Willis, MI. “Science and history always come alive through the books Sonlight has chosen. Through the years, the kids have read entire fishing and chicken farming encyclopedias multiple times because of the love for learning that captured them from an early age. The love for learning is only one piece; our children have learned to show compassion, empathy and to fight injustice in the name of the cross. We are so blessed to have Sonlight leading the way through our high school years.”

time periods in the life of residents of a small Connecticut town. It calls us to focus on the “little things” of life. We don’t know our time; therefore, as Solomon exhorts us: “A man can do nothing better than to eat and drink and find satisfaction in his work. This... is from the hand of God” (Eccles. 2:24). Poignant. Pb. **R: 9-A**

Outliers 430-04 \$16.99

☐ Gladwell. A staff writer for *The New Yorker*, the author writes brilliant essays about fascinating people. His argument that it takes 10,000 hours to become an expert (even for those geniuses, like The Beatles and Mozart), a phenomenal amount of time, can be an encouragement: if you have a passion, pursue that passion! Young people: go change the world! Pb. **RA: 6-A; R: 6-A**

The Portable Poe 430-61 \$21.00

☐ Poe. Poe was perhaps the most melancholy and deeply brooding author in American history. This book compiles Poe’s most famous works: tales of fantasy, terror, death, revenge, murder, and mystery. Includes “The Murders on the Rue Morgue,” the world’s first detective story. Also “The Pit and the Pendulum,” “The Fall of the House of Usher,” “The Tell-Tale Heart,” and “The Cask of Amontillado.” Poe’s poetry also appears here, including his famous “The Raven.” Pb. **R: 9-A**

The Scarlet Letter 430-64 \$8.00

☐ Hawthorne. A study of the tension between public and private morality, *The Scarlet Letter* carved new paths in American literary technique and substance. Hester Prynne, the first and arguably still greatest heroine in American literature, struggles to turn a badge that her community is determined should shame and destroy her into a badge of moral triumph. An embroidered “A” intended to stigmatize her as an Adulteress becomes a symbol for Able, Admirable, Angel—exactly opposite that which the social leaders have determined it should mean. In Hester’s struggle with the community that tries to condemn and ignore her, *The Scarlet Letter* has a conflict of great thematic significance. Pb. **R: 9-A**

A Separate Peace 430-01 \$15.00

☐ Knowles. An accident at a boys’ school. But was it an accident? A novel about relationships, about how we can both love and hate someone at the same time, about the human heart, about motivations. Beautiful, haunting, powerful coming-of-age tale. Pb. **RA: 6-A; R: 8-A**

Teaching a Stone to Talk 430-06 \$14.99

☐ Dillard. This collection of essays by a Pulitzer Prize winner, includes one of the finest I have ever read, about a solar eclipse. Dillard is thoughtful, perceptive, enjoyable, and unpredictable. Pb. **RA: 6-A; R: 8-A**

Their Eyes Were Watching God 430-02 \$16.99

☐ Hurston. Set in serval black communities in the Deep South in the early 1900s, this story of one woman’s life is told with a stunning, deeply moving, almost poetic prose. One of my favorite love stories ever, simply because the characters are so happy together. Pb. **RA: 6-A; R: 8-A**

Up from Slavery 420-60 \$12.00

☐ Washington. Booker T. Washington was a devoutly Christian man who, as a former slave, treaded a dangerous middle ground in a time of racial backlash and Disenfranchisement. As he publicly acquiesced to whites on issues of social equality, he fiercely exhorted blacks to unite and improve their lot. This classic autobiography recounts Washington’s life from childhood as a slave, through his struggle for education, his founding and presidency of Tuskegee Institute and his rise to national prominence. A man of real courage, talent, and dedication. Pb. **R: 7-A**

Explore how writers have repeated themes over 4000 years and six continents

Works from every inhabited continent, from ancient Babylon to contemporary England—four thousand years of literature.

For cultural literacy, it doesn’t get better than this.

Read the three great epic poems of antiquity: *The Iliad*, *The Odyssey*, *The Aeneid*. Homer and Virgil. Then Dante writes about Virgil guiding him through the Circles of hell in *The Inferno*, a connection across time and space, reaching from ancient Rome to Medieval Tuscany.

The Iliad portrays war; *The Odyssey* portrays a journey. *The Aeneid* splits its story between both war and journey. *The Inferno* is a journey, and a trip of self-discovery.

Self-discovery shows up in *Oedipus Tyrannus*, the Greek play, and in *Things Fall Apart*, a 20th Century Nigerian novel.

War. Journey. Self-discovery.

Again and again, in different times and places. This course captures our shared humanity.

Literature 530 Parent Guide 530-PG \$50.99

☐ Lykosh. Full schedule, assignments, notes, questions and answers, writing assignments, vocabulary, and cultural literacy for World Literature. Use this Parent Guide in conjunction with the Student Guide. The Parent Guide is identical to the Student Guide, but also includes answers to the study questions. Ready for your binder.

Literature 530 Student Guide 530-SG \$27.99

☐ Identical to the Parent Guide, but without answers, to allow the student to work independently.

The Aeneid 530-13 \$5.95

☐ Virgil. Mandelbaum, trans. The third of the three great epic poems of Western antiquity. The first six sections are like *The Odyssey* (journey!) and the last six are like *The Iliad* (war!). This translation won the National Book Award—it is outstanding. Pb. **R: 8-A**

Candide

530-09 \$4.00

☐ Voltaire. Adams, trans. How humorous this novella by the leader of the Age of Enlightenment. This satire, zippy and ridiculous (and funny!), follows a hapless innocent as he survives an unrelenting string of bad luck. How little he and his companions learn. And then it ends surprisingly beautifully. Pb. **R: 8-A**

Chronicle of a Death Foretold 530-18 \$13.95

☐ Garcia Marquez. By the most popular of Latin American authors. Based on the story of the murder of one of his friends, this has a bit of mystery, a bit of journalism. Amazing, unforgettable prose, like nothing else I’ve read. If everyone knew a murder was going to happen, why did no one intervene to stop it? Pb. **R: 8-A**

Copenhagen

530-22 \$15.00

☐ Frayn. This Tony Award-winner incorporates physics and memory and history and war in an amazing, thoughtful drama. One of my favorites. Pb. **R: 8-A**

Crime and Punishment

530-19 \$17.95

☐ Dostoevsky. Pevear & Volokhonsky, trans. Russian novels tend to be long, depressing, beautiful. So as Russian novels go, this is short-ish, not overly dark, and beautiful, by one of the world’s greatest novelists. It is also thrilling and, at times, funny. After reading a different translation, when I read this one, it amazed me so much, I stopped breathing during an early crucial scene. Even people who feel a bit daunted going in to this novel love it. Pb. **R: 8-A**

Don Quixote

530-17 \$7.95

☐ Cervantes. Starkie, trans. This is the world’s first modern novel; “after the Bible, it is one of the half-dozen books in the world most widely translated and studied.” Critic Macaulay thought it “the best novel in the world, beyond comparison.” With his faithful squire, Sancho Panza, Don Quixote sets off on picaresque adventures in 16th Century Spain. It has been entertaining readers for over four hundred years. Think about that. Four hundred years—and the slapstick and humor remains fresh and alive. Pb. **R: 8-A**

Epic of Gilgamesh

530-01 \$13.00

☐ Ferry, trans. The world’s oldest surviving narrative poem. Two enemies become close friends, and when one dies, the other goes in search of eternal life and finds a worldwide flood survivor. A readable translation of a powerful story. Pb. **R: 8-A**

The Essential Iliad

530-04 \$14.50

☐ Homer. Lombardo, trans. “Rage. Sing, goddess, Achilles’ rage.” So begins this epic, “probably the most magnificent story ever told about man’s prime idiocy: war.” This version keeps the entire plot intact, but drops a few of the chapters that are detailed depictions of war or funeral rites. It ends with my favorite last line in all literature. Pb. **R: 8-A**

Inferno

530-14 \$6.95

☐ Dante. Mandelbaum, trans. Dante’s epic of the Christian faith, “the supreme literary work not only of medieval Christendom but of the Christian faith in general.” Creative genius! The Inferno is a surprisingly amusing,

beautiful introduction to Medieval thought. This translation includes a good amount of notes: enough to comprehend, but not too many to overwhelm. Italian on facing pages. Pb. R: 8-A

The Insanity of God 530-02 \$14.99

☐ Ripken. After years of serving in a war zone, the missionary left, shattered, wondering how the Church survives persecution. Looking for answers, he visited countries around the world where people are persecuted. And he shares with us the answers he found, that we, too, might stand strong when the day of evil comes. Required reading in our family. Pb. R: 8-A

King Lear 530-03 \$6.99

☐ Shakespeare. "The supreme English poet and dramatist, considered by many the greatest writer the world has known," one book said, "many men have spent almost their entire lives on Shakespeare and felt no regret." Though I am not sure how many men could say that, spending a week on Lear is certainly worthwhile. It is a bracing play, a tragedy, a story of aging and manipulation and lying. With a sociopath, a mad king, a faithful daughter, blind fathers. (Students who do most of the Sonlight 100-level programs will come away having read, in my opinion, the best and most important of the Shakespeare plays. Whether I'm right or not, though, might take a lifetime of study, without regret.) Pb. R: 8-A

The Lively Art of Writing 530-11 \$6.99

☐ Payne. An inexpensive, thorough book on how to write an essay, along with excellent suggestions on improving prose. Personally, I found her chapter on transitions between paragraphs one of the most practical bits of writing instruction I've come across. Excellent. Pb. R: 8-A

The Misanthrope 530-06 \$15.95

☐ Molière. Wilbur, trans. Molière, "one of the greatest masters of comedy in Western literature," understood what makes us noble, pathetic, outrageous and funny, and he

satirized human folly to perfection. Fun to read, fun to watch on stage. Pb. R: 8-A

Night 530-08 \$9.95

☐ Wiesel. "One of the bedrocks of Holocaust literature." A gorgeous work of art. Seering. A work of real life horror that is so beautiful I look forward to reading it again, which seems paradoxical. Written by a Nobel Peace Prize winner. Pb. R: 8-A

The Odyssey 530-07 \$14.00

☐ Homer. Fitzgerald, trans. Odysseus, the trickster hero, makes his way home, and deals with what he finds there. The "first of all realistic novels, as it is the first of adventure stories, and still perhaps the best." I can open this translation at random and the incredible language and story instantly captivates me. One of the eight books I would take to a desert island. Pb. R: 8-A

Oedipus Tyrannus 530-05 \$11.00

☐ Sophocles. Meineck & Woodruff, trans. Sophocles is "among the few great dramatists of all time." Aristotle considers Oedipus Rex the ideal play ... most influential Greek tragedy in existence, the one most often revived, the one most universally studied." Such a work of power. Don't miss this one! Pb. R: 8-A

Other Voices, Other Vistas 530-16 \$8.95

☐ Solomon, ed. A wonderful collection of modern short stories from several parts of the globe that I think are under-represented: India, Latin America, Africa, China, Japan. I like the glimpse of different countries, and I like the specific stories selected for this course. I think they are a beautiful mix of universal experiences, in settings unique to their culture. What might a deadbeat dad look like in South Africa? What might aging look like in India? So great! Pb. R: 8-A

Persepolis 530-21 \$14.95

☐ Satrapi. A graphic novel with beautiful art ("high-contrast inking") shows the author's childhood in Iran

“At first, buying the full Sonlight programs seemed expensive, but I have received the pay off,” writes Andrea S of Burlington, WA. “Last year, my oldest began taking classes at the local community college [while still in high school]. He has done excellently in his college classes—all A’s and B’s.”

“During our 13 years with Sonlight, however, our family has moved 10 times. I have also homeschooled through three pregnancies and the joy of newborns and toddlers. Sonlight makes it easy to cuddle on the couch and do the day’s reading together. It’s all planned out for you!”

during the Islamic Revolution and war with Iraq: war, grief, fear, turmoil. Powerful. Pb. R: 8-A

The Ramayana 530-15 \$16.00
☐ Narayan, trans. Distinguished Indian novelist R. K. Narayan summarizes the lengthy Eastern epic poem in zesty prose, so it is a shorter, fun, fairy-tale like story, “a wonderful tale to read for its romance and adventure.” Since almost every person in India knows this story, or about one in seven in the world today, isn’t it time you read it, too? Pb. R: 8-A

Risking Everything 530-10 \$20.00
☐ Housden, ed. Mary Oliver asks, in one of her poems, “Listen, are you breathing just a little, and calling it a life?” This collection of 110 poems from around the world and from many ages encourages the reader to embrace life. Enjoyable, understandable, accessible, beautiful. Love it! Hb. R: 8-A

The Stranger 530-20 \$13.95
☐ Camus. Ward, trans. Through the story of an ordinary man unwittingly drawn into a senseless murder on an Algerian beach, Camus explored isolation in postwar society. The narrator tells what he does, but gives no reason for any of it. This book, by a Nobel Prize winner, is compulsively readable, clear, beautiful. Pb. R: 8-A

Things Fall Apart 530-12 \$11.95
☐ Achebe. Described as “an African Oedipus or Lear brought down not only by fate but by his own stubborn pursuit of inappropriate goals and his blindness to circumstances.” If you could only read one book from all of Africa, this 20th Century work is the one to read. Pb. R: 8-A

Delight in this college prep survey of significant, beautiful literature

The author of this program, an English and Humanities major, was disappointed in her college education. As such, she had a good idea of the teacher she didn’t want to be.

So she chose the books she loved the most, from Old English, Middle English, and on through modernity—poems, plays, novels, and travelogues. And she put them together, with lighter reads interspersed with the challenging works.

She dusted off her notes from her few good classes, and researched and studied and delighted in these amazing gifts of literature. How much richness good authors pack into their work!

She found literary terms and taught them in the context of the books, so that students who choose to take the AP British Literature exam will be prepared with but a little additional study.

Come and be delighted and amazed.

“We are in our 14th year using Sonlight, writes Lois B of Valparaiso, IN. “The literature-based format and the emphasis on seeking to raise winsome Christians (along with Instructor’s Guides with everything scheduled for us!) convinced me to try Sonlight and to keep using it.

“The continuity of knowing we’d be Sonlighting made it easier for us to follow God’s calls to other places as we made four interstate moves. The connections that come from using Sonlight multiple times with different children is an added benefit to me. As I go through each History/Bible/Literature program again with my younger daughter, I can emphasize details and themes that are even more important than I realized the first time through.”

Dubliners

630-08 \$5.00

☐ Joyce. Fifteen short stories by one of the most influential writers of the 20th Century. Snapshots of life in Dublin. None have surprise endings (Joyce is not O. Henry); none have strong moral conclusions (Joyce is not Aesop); but all are beautifully written. A wonderful introduction to this difficult and significant author. Pb. RA: 10-A; R: 11-A

Emma

630-09 \$7.95

☐ Austen. Clever Emma is clueless about match-making. She thwarts good relationships and tries to create romance where none could exist. Finally, to her chagrin, she realizes how little she knows. Delightful. Pb. RA: 8-A; R: 10-A

“Sonlight’s science kits have been a lifesaver in providing the equipment necessary to turn our kitchen into a science lab!” writes Tara D of Middletown, DE. “We love the flexibility of being able to work through *Apologia Biology* at home, handling experiments as they come up in each module’s reading.”

Here, Molly (15) examines a slide under the microscope for her biology course. She’s been Sonlighting for 11 of her 12 years homeschooling.

Science 250

☐ Biology

CD-Rom Package	250-05	\$499.97
Textbook Package	250-00	\$543.97

This program balances subject reading with an optional experimental biology component including microscopy and advanced dissection.

The key text, Apologia's *Exploring Creation with Biology*, incorporates an engaging, conversational tone capable of grabbing teenagers' attention and keeping their minds on track. The authors give a Christian viewpoint and lift up God's incredible design for the world. Colorful illustrations, photos, tables and charts reinforce learning items, and bring the awe and intricacy of creation to mind. The biology program includes solutions and tests, and we've also created a Sonlight-style schedule guide to complement the course.

The course study begins with a "macro" view of our living world. Your students learn about Kingdoms and Phyla and the steps needed to identify and classify many animals and plants. Students move on to the "micro" perspective with single-celled organisms and their reproduction, then on to genetics, and finish with ecosystems.

Budding biologists will use the Sonlight Ultra Microscope to uncover the marvelous movement, shape and color of microorganisms invisible to the naked eye. They'll follow detailed instructions from Sonlight's Advanced Dissection Kit to delicately explore the internal organs and external structures of four different specimens from land and sea. Please note: many colleges look for at least one lab science on a student's transcript. To gain hands-on experience with a microscope, as is often included in a lab course, you may wish to purchase the Microscopy Supplies Kit (item 250-25). To supplement the course material and hands-on experiments, you'll find outstanding multimedia elements that include audio pronunciations of key vocabulary terms, animated versions of illustrations, and video clips of a variety of microorganisms. Exploring Creation with Biology, CD-Rom Version 250-21 \$65.00

☐ Wile & Durnell. 2nd Edition. A thorough high school-level biology program designed for use at home. Includes illustrations, photos, tests, solutions.

You'll find audio pronunciations for almost 360 unique vocabulary words found in the course, plus 68 video clips and graphic demonstrations. Dr. Wile shows you, for example, some microorganisms you are unlikely to be able to see on your own; he also discusses—with live video examples—what you should be looking for and how you will look for it through the microscope; he explains out loud—with animated graphics—some of the more difficult concepts and processes; and he presents live footage of the creatures you are studying.

“My daughter, Ellie (16), enjoys the engaging curriculum from a Christian perspective,” writes Helen C of Riverside, CA. “She enjoys the exposure she is getting to different perspectives in our society through the literature she is reading. She even likes to assign books to her grandfather so that she can discuss them with him.”

In this photo, Ellie works on her experiments for *Apologia science*. The C family has been homeschooling with Sonlight for six years with their four children. They are using Sonlight E, H and G.

Sonlight™ Ultra Microscope 250-40 \$260.00

☐ Unless you're a science professor, the words we would use to describe this microscope would mean very little to you. It is high quality. As one customer said: "I love the Sonlight microscope! I used to work in research and I have used many, many expensive scopes in my time. This year I'm teaching High School Biology at our co-op and the leaders asked me to choose a microscope to use. I researched every one that I could find, ranging from less than \$100 all the way to the \$1000s. For what we're using in high school class I thought the Sonlight scope seemed best. We ordered 5 and have no regrets! I highly recommend Sonlight's microscope."

Visit sonlight.com/microscope for a thorough explanation.

Microscopy Supplies Kit 250-25 \$77.99

☐ As virtually everything we carry: we have done everything we can to make this a complete kit, so you have to do as little shopping as necessary. Includes 10 glass slides and covers; 4 eyedroppers; 1 bottle Methylene Blue; 1 bottle Iodine; 1 coffee filter; 1 toothpick; 1 pack, 50 sheets lens paper; 10 sheets microscope drawing paper; chick embryo microslide; 16 prepared slides: Ascaris mitosis, onion root tip mitosis, Amoeba Proteus, Paramecium, Euglena, Planarian, Spirogyra, Hydra budding, Zea Mays stem cross-section, Zea Mays root cross-section, Ranunculus stem cross-section, Ranunculus root cross-section, Grantia spicules (whole mount), leaf cross-section w/ vein, Volvox, Diatoms; slide case. (Consumable)

Advanced Dissection Kit with Specimens 250-30 \$76.99

☐ For use with Apologia Biology. May be shared. Includes three disposable dissection pans (we could charge you another \$10 to \$20 for a single non-disposable pan, but what would you do with it after you've done the experiments?); T-pins; scissors; forceps; scalpel; dropping pipet; vinyl ruler; teasing needle; case to hold all the above tools; complete step-by-step descriptive dissection manuals for each animal (includes far more information, and far more detailed instructions than Dr. Wile's textbook offers on its own); four specimens packaged in an easy-to-open container: frog, crayfish, yellow perch, and worm. Note: the animal specimens are initially preserved in the best preservative possible: formaldehyde. Problem is, as you would know if you've done dissections before, formaldehyde is an obnoxious-smelling (as well as toxic) liquid. That's why we've displaced the formaldehyde with water, then displaced the water with a glycol solution. You enjoy a very decay-resistant specimen, but without any toxic fumes or messy liquids. Specimens store indefinitely when kept in a plastic bag, but we recommend that you use them within a year of purchase for best quality. (Consumable) *Cannot be shipped directly to some foreign countries.*

☐ Chemistry

Level 350 Science Program

350-00 \$189.98

The 300-Level *Exploring Creation With Chemistry* addresses the theoretical and mathematical basis of chemistry and follows a sequence of learning similar to the biology program. Several fascinating experiments boost learning dramatically as they demonstrate universal formulas and concepts such as mass, density, volume, and more. Several projects include solving for unknown ratios, and *Exploring Creation With Chemistry* explains ratios and their associated calculations better than any math book we've found. (Note: Students who have not completed Algebra 1 prior to taking the course will find the work and calculations challenging to master.)

The course includes solutions and tests, a Sonlight Chemistry Schedule Plus, and a Chemistry Supplies Kit.

If your students complete the experiments that go with the course, they will have a true, upper-level high school science experience. For details about the textbook package go to sonlight.com/350-00

☐ Physics

CD-Rom Package	450-05	\$107.98
Textbook Package	450-00	\$151.98

The 400-Level physics program provides a wonderful, advanced high school level science experience, well-suited for college preparation. Students should have a strong math foundation since the text is filled with formulas, practical applications, and experiments.

The course style is similar to the Biology and Chemistry studies. *Exploring Creation With Physics*

—supported with solutions and tests, multimedia explanations and demonstrations, and experiments—is the program's central learning tool. It presents 16 modules which follow the format of subject presentation, "solve on your own" problems with answers thoroughly explained, and end-of-module test questions.

The modules cover a variety of physics laws and concepts vital to those considering the engineering or physics fields: velocity, acceleration, friction, momentum, the speed of light and sound, torque, tension, energy, fuses, and circuits. *Exploring Creation With Physics* incorporates situations and objects present in an adolescent's everyday life to help illustrate and reinforce key points. Exploring Creation with Physics CD-Rom Version 450-21 \$65.00

☐ Wile. 2nd Edition. A solid math-oriented introduction to physics. Excellent preparation for mathematically-inclined students who have an interest in pursuing technology or engineering. Though the math is related to the physical world, its practical applications are primarily by means of thought experiments concerning such things as moving cars and shooting bullets. This course is filled with mathematical formulas and includes a few drawings to illustrate some of the applications.

In order to understand the text, a student must be comfortable with the sine, cosine, and tangent functions, along with their inverses. Explanations are extremely thorough and easy to understand (for those who have the proper math background).

You'll find audio pronunciations for unique vocabulary words in the course, plus video clips and graphic demonstrations. Dr. Wile shows you, with video examples, what you should be looking for and how you will look for it; he explains out loud—with animated graphics—some of the more difficult concepts and processes; and he presents live footage of what you are studying.

Saxon Advanced Math Program

“I’m so thankful Sonlight does all the research and has the best books for each grade level,” writes Angie W of Greenwood, IN. “We enjoy snuggling on the couch for Read-Alouds and I love the look in my children’s eyes when they ‘get it!’”

Angie says her family had been homeschooling for over three years when she and her husband had a major crisis in their marriage. “We made the difficult decision to send our two oldest to a 4-star, Grade A public school. I had to work a full-time night shift and felt it was easier to have them in public school.” After two years in public school, however, and despite being in small classes, the boys begged to come back home with me and Sonlight.

“Now I had four children and was still working full-time nights. We made it happen, though, and, three years later (seven, total, with Sonlight), are still happily Sonlighting. I’m also happy to say my husband and I are closer than ever!”

Here Kendon (14) enjoys the independence of learning math on his own. “I love knowing I have step-by-step solutions for his Algebra!” says Angie.

Math-U-See

(Grades 8-12)

Created by a longtime teacher, Math-U-See is a hands-on, student-paced, mastery-based approach that focuses on developing a true understanding of mathematical concepts transferable to real-world application.

You'll follow a 4-step approach to introduce, review, practice and master concepts. Since math is learned sequentially—independent of age or grade—the program teaches skills that build on previous principles as your child progresses.

The multisensory “Build it – Write it – Say it” method of instruction lets children explore each new concept and helps you assess their understanding before continuing.

- **Concept-driven:** Children gain thorough understanding by learning how to solve math problems, why they're solved in the prescribed manner, and when to apply the concept.
- **Mastery-based:** You'll know when they've mastered a concept when they teach it back to you, indicating readiness to learn the next skill.
- **Skills-based, multisensory approach:** Math-U-See addresses the different ways we process information. As your children incorporate all senses in meaningful ways that aid retention, they'll build essential cumulative skills.

Other considerations

You may want to review the video instruction prior to each lesson to ensure that you understand how each concept is best taught. You'll find that using every component of the program—instruction manual, video lessons, manipulatives, practice and review pages—will contribute to your student's success.

Because the program isn't grade-based, we offer a placement tool on our site to determine where to start your student.

“Over the years I have seen the results from using Sonlight,” writes Marvalinn S of Farmington Hills, MI. “My children are becoming great communicators. Potential homeschooling parents now ask me about my experience and I can respond in confidence. Much of this has to do with the Sonlight Curriculum and, of course, allowing the Holy Spirit to guide me on this journey.”

Here, Autumn (15), Daniel (11), Grant (13), and Broc (9) serve as models for Grant's photography class. They have homeschooled from the start and have been Sonlighting the entire time. The children are currently using levels 300, 100, G, and E.

What Good is Christianity?

Grades: 11-12 • Ages: 16-18

One-Semester

In an age where misinformation about Christianity and its influence abounds, the goal of *What Good Is Christianity?* is to educate and equip students regarding the positive role and influence of Christianity in various spheres.

Consequently, our goal in this program is to expose students to a variety of ideas they are likely to encounter in their Christian walk, while at the same time providing helpful insight as your children wrestle with these challenging ideas.

Full of rich narratives and intriguing questions, this 18-week curriculum for upper-level high school students includes seven carefully-selected resources to accompany your Instructor's Guide. Inside your IG you'll find the schedule, notes, assignments and discussion questions, plus four articles: one each on interpretation (hermeneutics), faith and science, spiritual warfare, and Christianity and women.

Topics include slavery, science, charity, the environment and more. Popular-level, readable book with intellectual depth.

What Has Christianity Ever Done for Us?

660-04 \$24.95

☐ Hill. Dry wit and colorful illustrations enhance this compilation of positive contributions Christianity has made to the world. Topics include Christianity's influence on culture, thought, the arts, education and society. “We love how Sonlight's approach to education transcends all age barriers,” writes Annie R of Porter Corners, NY. “No matter what level book I pick up, ALL of my children are interested. The youngest will listen and ask questions about the upper level books. The oldest haven't outgrown the younger books (even if they've already read them). And parents are included in Sonlight's guaranteed love for learning, too!”

“Every day, I'm introduced to a wealth of information I never learned in all my

years of schooling. Better still, I'm learning so much about my children! As they answer Sonlight's thought-provoking discussion questions, I discover more and more of the work God is doing in their hearts.”

In this photo: After Arianna (14) has enjoyed her biology class all year, she teaches little siblings Jadon (7) and Hannah (5) about microscopes, too. The R family is studying Sonlight levels 200, G and A in their fifth year Sonlighting.

Advanced Apologetics

Grades: 11-12 • Ages: 16-18

One-Semester

Prepare your teens for the transition to college and beyond with a sure footing in their faith. In a world where many young adults abandon their faith, give them the tools to know that following Christ is “true and reasonable” (Acts 26:25).

Advanced Apologetics equips your students to understand and gracefully defend their beliefs. Examine arguments from skeptics, atheists, and other faiths. Become familiar with compelling responses to these arguments.

Use this knowledge to develop a game plan to respond to opposing viewpoints. We want your students to know why they believe. But we also want them to be able to communicate that belief in the face of opposition with reverence and humility.

This 18-week elective is perfect for college-bound juniors and seniors. Pair it with “What Good Is Christianity?” for a full-year elective.

Philosopher, educator and homeschool dad Robert Velarde chose three excellent, accessible books to guide your path. The Instructor’s Guide includes easy-to-follow notes, vocabulary, and discussion questions to help students absorb the content.

Instructor’s Guide

610-01 \$40.99

☐ Velarde. *Advanced Apologetics* includes three books carefully selected from a wide selection of contemporary resources on the defense of the Christian faith. The books are intended not only to address intellectual matters, but also to emphasize the development of moral character and the nurturing of a winsome approach to sharing and defending the faith.

Christian Apologetics:
A Comprehensive
Case for Biblical Faith

610-03 \$42.00

☐ Groothuis. This is one of the finest contemporary books covering the broad spectrum of apologetics that offers both positive evidence for faith and a thoughtful critique of other viewpoints. As a graduate-level seminary professor, Groothuis is thoroughly familiar with the defense of the faith. And while the length of the book may at first glance be somewhat intimidating, the chapters are well-organized and generally straightforward enough for the layperson to grasp. The one possible exception is chapter 10, on the ontological argument for God’s existence, a complex subject to condense into a single chapter. On the whole, *Christian Apologetics* is one of the best resources available on the topic.

A Little Primer on
Humble Apologetics

610-02 \$13.99

☐ Sire. *A Little Primer on Humble Apologetics* provides a solid foundation for the practice of apologetics. The author addresses the definition of apologetics, its value, limits, contexts, arguments and the call to defend the faith. As he so astutely points out, the defense of the faith is not just about having the best arguments or evidence, but also about approaching the topic with humility. As such, this is the first book students will read over the course of the 18-week elective.

Tactics: A Game Plan for Discussing
Your Christian Convictions

610-05 \$15.99

☐ Koukl. Author Koukl holds a graduate degree in apologetics. Beyond academic credentials, he’s also an experienced apologist, interacting with people regularly on his radio broadcast and via his ministry, *Stand to Reason*. Koukl has for years been living out his approach to conversing with others about Christianity. *Tactics* is a collection of his best insights. The book is not so much about apologetic arguments, but about the approach one can take in dialogue with others. As such, *Tactics* is essential to apologetics and evangelism. It can help us become better speakers, listeners and winsome ambassadors for Christ.

Advanced
Apologetics Guide

“While a family would certainly benefit from Sonlight for a single year, we have found an added benefit to using Sonlight over many years,” writes Jen R of Chelsea, ME. “With Sonlight, we can be sure that we are studying every major historical or culturally relevant topic that we want to discuss, but without needless repetition. We love how we can build off of the foundation we have gained from other Sonlight programs. As a mom, I appreciate the meaningful conversations with my children as they grow older.”

Here, Catherine R (16) snuggles with her dog, Sunny, as she works on 610 *Advanced Apologetics* and Sonlight 300 in her 12th year Sonlighting.

Psychology

Grades: 11-12 • Ages: 16-18

Full Year

The Sonlight Psychology package ties in the science of psychology with the art of understanding how people work.

Jeff Corson has been teaching Advanced Placement* Psychology since 1999 and has enjoyed not only seeing students grow, but has also seen them perform well above the national average (80-93%) in achieving college credit for the course.

Corson negates the perception that psychology is the domain of unbelievers and views it simply as the study of God's workmanship. His workbook helps prepare students to maintain and strengthen their faith in a college/world environment where their beliefs may be challenged daily.

Corson suggests a timeline of August to April for students who want to take the national Advanced Placement* Psychology test in the U.S. in May.

Corson's workbook uses a textbook that features history, facts, terms, real-world applications, and a

sprinkling of laugh-out-loud cartoons.

This course is a great introduction to psychology for aspiring college students or anyone interested in human behavior and design.

“I never expected to find a curriculum that would change our lives,” writes Amanda W of Westcliffe, CO. “Sonlight made the transition to homeschooling effortless through their guidance online and with Advisors. We wanted a curriculum centered on God’s Word, and I was delighted that Sonlight focuses on teaching children the ‘whys’ behind what we believe.”

“The curriculum incorporates a theme each week that gives children just enough repetition to help them grasp the concepts. We look forward to school; the day is full of fun activities and precious moments spent together. The joy of watching my children develop a love of reading and learning is priceless.”

\$20,000 Scholarship Winner

(\$5,000 per year)

Kaycie Kelly of Muldoon, TX joins Jonathan Edwards in praying, “Lord, stamp my eyeballs with eternity.” Her longing is for Christ, to make Him known to all nations, that His Kingdom

would come. This has shaped all of her learning, thinking, serving, endeavors, and relationships. Independently, Kaycie supports missions prayerfully, relationally, and financially, using money she earns from her jobs babysitting and as an office assistant. Her leadership in her 4-H club helped her team reach Nationals. Noted for her kindness, her “humble ferocity to the faith,” her creativity and service, Kaycie lives her life by the word of God, reaching out to those in need. She has used all the Sonlight programs from C on up, including all the high school programs. She even added on British Literature to read over two consecutive summers (a great idea for all book lovers), and looks forward to attending a Great Books program in the fall.

University (the alma mater of both her parents) and play softball. But since then, she’s fallen in love with writing. Fan Fiction, NaNoWriMo, blogging, youth group devotionals, video scripts—she passionately pursues good stories. And, through her stories, hopes to introduce people to the story of Jesus. She plans to study creative writing when she heads to Colorado Christian University in the fall.

Hannah Hastings of Kerrville, TX, a Sonlighter since 2004 (using A-400!) has enjoyed everything from war reenactments to volleyball, from 4-H to Bible study—a wide range of activities, but all unified by her love for people. She has spent scores of hours on the Student Council, participating in a variety of community service projects to bless another person’s life in some way. Hannah also has volunteered at Camp Blessing the last five years, a Christian summer camp for young people with special needs. She was one-on-one with a camper at all times, including one week with a nonverbal camper, where she “showed unique perseverance” in finding ways to communicate. Because of her passion for people with disabilities, she looks forward to becoming the fourth generation of her family to attend Texas A&M University, where she’ll study communications, with the end goal to promote disability awareness and inclusion.

Jeffrey deSpelder of Lansing, MI, a Sonlighter since 2005, has been part of the three-time National Homeschool Soccer Champions and has won the Ingham County Right to Life Speech Contest. When studying Sonlight’s government program, he took the initiative to get an internship with a Michigan State Representative.

What he talked about most, though, was the last four years he has spent volunteering with the after school program Fire-Up for Life. Working with children who have been “bullied by classmates and ignored by parents,” who sometimes behaved badly, he was ready to quit. Then

he realized that the Lord didn’t give up on him, but loved unconditionally. Renewed, he carried on, demonstrating that he was one of the rare few who not only have the skills but the heart to effectively reach this difficult demographic. Having finished three years of Arabic study, Jeffrey plans to study pediatric medicine, in order to volunteer in the Middle East, a region that first interested him when studying Sonlight F.

Mallory Fehl of Fishers, IN lived in Ethiopia for her first sixteen years. When she read *A Long Walk to Water* in Sonlight F, she saw the walk for water literally happening around her, and saw how her parents—digging wells, running a medical clinic, planting churches—were laboring for the gospel. She spent a summer at Schloss Heroldeck in Austria, a ministry retreat center that can keep rates low for weary laborers by using volunteer workers. When her aunt taught her to crochet in 2012, she soon taught others. Their Crochet Club made blankets for the orphans at Embracing Hope in Addis Ababa. And one of Mallory’s crochet students taught the craft to male evangelists, who now crochet, preach, teach crochet, and answer questions as they speak to interested audiences. “I never thought that crochet could be used as an evangelistic tool, but it can. It turns out God can use anything.” Mallory looks forward to studying elementary education, in hopes of returning overseas after her education.

Daphne Gwozdz of Peoria, AZ has used Sonlight from preschool on. It served her well, with an SAT score of 1500! On track to receive the AWANA Citation Award (for ten years of intense Scripture memory and study), she also leads and serves at church. More importantly, as one adult mentor said of her, “Her group of friends is eclectic and she has unconditional love for all of them. She is very caring and encouraging. She is always kind and thoughtful. I have never heard a negative or unkind word from her.” As a child, she wanted to go to Arizona State
