

Pipe Cleaner Ornaments

SUPPLIES:

- 1 gold, metallic pipe cleaner
- Star-shaped cookie cutter
- A small length of ribbon

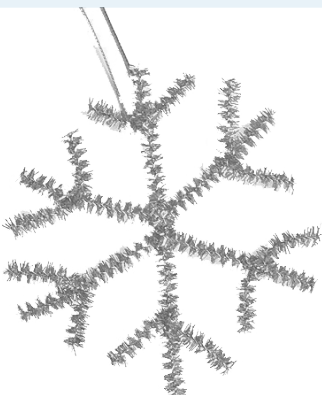

DIRECTIONS:

1. Using the cookie cutter as a guide, wrap a pipe cleaner around it. Center the pipe cleaner on the bottom of the star cookie cutter. It can get a little tricky going around the corners of the cookie cutter. You'll need to use your thumb to press down to hold the pipe cleaner in place and use your other fingers to bend the pipe cleaner as you go. Bend the pipe cleaner around all the points of the star.
2. If your pipe cleaner is not long enough to wrap all the way around your cookie cutter, take a second pipe cleaner and twist two end together.
3. Once you've made it all the way around, bend the two ends together to close the loop. Thread a piece of ribbon through to make a loop so you can hang it on your tree!

Snowflake

SUPPLIES:

- 2 silver metallic pipe cleaners per snowflake

DIRECTIONS:

1. Cut one pipe cleaner into 3 equal pieces (about 4 inches long per piece)
2. Gather all three equal-length pipe cleaners so that ends are even.
3. Twist all three pipe cleaners together at the center, two or three times.
4. Spread out all the "arms" so they are equally spaced into a six-sided star shape.
5. Cut the second pipe cleaner into 6 equal pieces (about 2 inches long per piece.)
6. Take one of the 2-inch pieces and twist it around one of the pipe cleaner ends in the star shape you made. Twist it so there's an equal length of pipe cleaner on both sides.
7. Bend the ends outward to make a V shape and repeat on all sides of the snowflake.
8. Tie string on one end to hang it on your tree!
