

SONLIGHT Shopping List

Sonlight offers literature-based subjects (Couch Subjects™) and skill-based subjects (Table Subjects™). Use this guide to choose your curriculum and ensure you've ordered everything you need, for every student—from preschool through high school.

1 COUCH SUBJECTS™

Sonlight uses real books to teach History / Bible / Literature and Science. Unlike grade-level workbooks, good books appeal to a range of ages, so families can use each program for students within a two to four-year age range.

For individual students, use the chart on the next page and select a program according to your child's age and interests. Aiming for the middle of the age/grade range is our best recommendation.

When combining students, choose a single program to share for all students within about three years of age. We recommend choosing the lowest level suitable for your oldest child.

HISTORY / BIBLE / LITERATURE (HBL)

Start by choosing a History / Bible / Literature program. Sonlight's flagship product includes Bible, history, geography, and all required books, all connected with the award-winning Instructor's Guides. Programs are available from preschool through high school.

SCIENCE

Programs available from kindergarten to college-level lab sciences. (Preschool and PreK programs include science—it's not a separate purchase.) Use the chart on the next page and select a program according to your child's age and interests.

2 TABLE SUBJECTS™

Match each student's ability with these skill-based subjects. Each student should have their own programs.

READERS

Readers are included in every HBL program. There are five Reader levels available for HBL programs K through C, so you can customize according to your child's needs. Take the free reading assessment on our website to select the appropriate level.

For students using Sonlight HBL levels A-C, we recommend you start with the Language Arts level that matches your student's ability first, then choose the matching Reader set, regardless of reading ability.

Starting with HBL D, all subjects are linked together: history, geography, Read-Alouds and Readers, all of which also coordinate with the same level Language Arts program, so there is no need to choose Readers.

LANGUAGE ARTS

Sonlight Language Arts programs coordinate with HBL programs, and will walk you through how to teach your children all the vital skills they need to be good communicators. From phonics, letter formation and reading in the early grades, to writing instruction, grammar, spelling and all of the other skills that students need to communicate in adulthood. Take the free language arts assessments on our website to find the right level for each of your students.

HANDWRITING

Handwriting Without Tears is included in our All-Subjects Packages for levels A-D. You can customize the level or substitute with *A Reason for Handwriting* or *Getty-Dubay*. Additional levels of all three programs are available on our website if you want your child to continue practicing handwriting.

MATH

Choose from our large selection of math programs including *Math-U-See*, *Horizons*, *Saxon*, *RightStart Math*, and more. Choose the program that suits your student's learning style and ability. Visit sonlight.com/math to take a free math placement test and for a handy comparison guide of available math programs.

SPELLING

Spelling is included in Sonlight Language Arts programs through level 4. *Spelling You See* is included in our All-Subjects Packages for levels D-F. Customize for each student based on ability.

3 OPTIONAL SUBJECTS

Sonlight offers all subjects and all grades. From hands-on history projects, to lap books, to a wide range of electives and a number of optional resources and supplements, visit our website to round out your school year choices.
